

## A collection of LEGO Technic components and cables laid out on a light gray surface. At the top are three motor assemblies: one black and two gray with red gears. Below them are various structural beams, including long black and red ones, and several gray frames. A large pile of black pins is on the right, with smaller piles of blue pins below it. A single black gear and a yellow gear are also visible. On the left, there are several black cables with clear plastic connectors.
